# ROOTED IN EXPERIENCE. BUILT FOR GLOBAL SUPPLY.

Namsal's roots date back to 1970, beginning with cold storage operations in Istanbul. In 1998, this experience led to the official establishment of Namsal Gıda, followed by the start of IQF fruit and vegetable production in Bursa in 2001. Export operations expanded in 2005, strengthening the company's international reach.

Today, Namsal supplies conventional and organic IQF fruits and vegetables to international B2B markets, with flexible solutions tailored to customer requirements.

## OUR JOURNEY

## NAMSAL AT A GLANCE

Built for dependable, flexible international supply.

# CONTROLLED FROM SOURCE TO SHIPMENT.

From controlled growing regions to IQF processing and temperature-controlled delivery. Each stage is managed to support consistent quality, traceability and reliable B2B supply.

01

## CONTROLLED SOURCING

Raw materials are sourced from selected growing regions under controlled conditions.

02

## RECEIVING & PREPARATION

Incoming raw materials are inspected, sorted, washed and prepared to specification.

03

## IQF FREEZING

Rapid individual freezing helps preserve natural colour, texture and quality.

04

## PACKAGING & COLD CHAIN

Flexible packaging formats, frozen storage and temperature-controlled dispatch.

# QUALITY YOU CAN VERIFY.

Our quality assurance system includes raw material inspection, laboratory testing, traceability and temperature-controlled handling.

Illustrative image

01

## RAW MATERIAL CONTROL

Approved growing regions and incoming raw material inspection.

02

## LABORATORY TESTING

Physical, microbiological and pesticide residue testing.

03

## TRACEABILITY

Lot-based records maintained from processing through dispatch.

04

## TEMPERATURE CONTROL

Frozen storage and cold-chain handling.

## CERTIFICATIONS AND MEMBERSHIPS

CERTIFICATES AVAILABLE UPON REQUEST
